6°3

I have three groups and the best one is 6°3 they all like the activities that I bring to the class, must of them behave excellent in the classroom and the all like to participate orally; the only issue that sometimes make my class difficult is that they are 48 students and is hard when they all want to participate at the same time they start to yell in order to make me hear them and sometime I cannot manage that.

6°5

This group is difficult for me, in this grade are all the undisciplined students, today a boy hit

a girl with a notebook, I handle the situation and I took the boy to the connivance coordinator and talk with him about the situation, the boy was suspended.

I have the opportunity to share with my students outside the classroom; it was the school birthday and I had to walk with them in the parade and also I sang in the cultural show the school prepared, my students were surprised because they did not know that I could sing. Also I prepared a performance with some of my students, they sang a song in English; they love it.
