

*Week from 3-6 May, 2016*

*During this week we could work in different activities I keep working hard on students' motivation and interest for the class, unfortunately I see that this classrooms has many problems that can become in bigger problems later. During the classes the students show their demotivation for the class and it is not only with English class but with all the classes, keep working!*

*Week from 10-13 May, 2016*

*During this week we couldn't arrange most of our aims, it has to do with the bad behavior that has been increasing during the last days, the students are not even interest in working with the native teacher, and it is a real problem that all the teacher are facing in this classroom, this is frustrating for a teacher that has planned his classes and they are not been appreciated for them. I have called their attention many times and in many ways but I think that is a general problem that this generation is facing, unfortunately they don't value what they have and what they teachers do for them. On Thursday I wanted to read them a short reflection about value all the things we have and value everything God provide us every day, at the beginning they seem to want to cooperate and change their attitude but after some minutes madness appeared again. I have planned to do a game board with them but their behavior didn't let us do it. I hope next week they can behave in a better way.*

*Week from 17-20 May, 2016*

*During this week we could arrange the aims, it could be done because the students' behavior has improved and their interest during the classes has also helped us. We still have to work on some aspects of discipline and education that don't let us improve totally our work and arrange all the objectives but I think that during these days we would be able to arrange it. Hopefully they are motivated and want to behave in a better way. There are still things to enhance. I wish they could be in a bigger classroom and be less students but we have to work with it.*

*Week from 23-27 May, 2016*

*During this week we couldn't arrange the aims, it could not be done because the students' behavior has again raise and some of them keep interested in the work or things we do during class but unfortunately I have made some conclusions about that situation and it has to do with a general problem that the classroom has, the students that want to work are getting contagious with the bad attitude that almost all the classroom has, they do not appreciate the opportunities they are given and it is really frustrating but at least some of them still being engage with the class and want to improve what they know and learn more about the language. In other hand is wonderful the immersion that you as teacher can have and feel when you spent time not only in academic activities but also different activities that in the school are done, like general presentation for teacher's day, or holly week or religious mass*

*Week from May, 31<sup>st</sup> to June, 3<sup>rd</sup>.*

*This week the work was short and it has to do with some situations that appear, but we have work with the planned and still do as much as possible. Unfortunately their interest for the class has decrease a lot and I think that it is because they feel that the semester has finished and they do not realize that they have to keep working for three more weeks. I keep doing and giving my best for them but I won't frustrate anymore for their behavior, even if you spent 10 or 15 minutes talking with them looking to improve and enhance their behavior and interest they don't listen it. At least some of them do and keep working as hard as the first day.*
