

REFLEXION: seventh week of class (May 12, 2016)

This week I work with the 7 grades, which in this opportunity they did not want to participate in the activity and they were talking too much even though I lost my voice, and it was difficult for me to talk and continue with the lesson, besides, there is one student who is all the time standing up and talking and he doesn't let me to give the class, and sometimes what I use is to make him do extra activities and that way he can be focused on something, but it just works for some moments, and he makes to increase the indiscipline in the class, also I brought a listening activity of a modern song because I thought they would like it and it would work, but they were not paying attention to the activity and they think not to be interested in listening activities.

In conclusion I did not feel happy at all this week because even I've tried to apply different techniques, seems that either of them are working, but besides of that it has helped me to keep searching for new teaching ways. And not to keep doing the same mistakes at the moment of teaching a lesson.
