

My fifth week

In the first activity of this week the students were very happy because they could use their technological materials for the class, they worked quietly and in an excellent way, and in the presentations they had at the end of the class I was surprised because they did more than I was waiting for, they did an excellent job!

This class was the most spectacular class I have had ever, in this class was the talent show and my students did a marvelous job, they are full of talents, I loved everything they did, the locker room, the stage, their attitude, their love to do everything! This class was the best and they were like five years old kids, very very happy!
