7. ESTRATEGIAS METODOLÓGICAS

The course follows a task-based approach that consists on fostering different language skills in students while performing a task without pre-determining the language to be studied. Learners learn while completing different tasks. This methodology follows different stages:

Pre-task: In which the students will receive concise instructions and input to determine what to do and to recall some language. This stage will be based on some tasks samples providing the students with a clear model of what is expected to do.

Task: Learners complete the assigned task individually, in pairs or in groups using different features and structures of the language while the teacher organizes and encourages the process.

Students plan and practice what they are going to convey while the teacher monitors and advises to figure out any language questions or doubts. This stage is followed by reporting orally or in a written way to the class taking into account the order the teacher chooses. These practice activities will afford opportunities for the students to talk about their own experiences. Finally, the teacher gives feedback and suggestions to the students and the rest of class.

Post task: Learners evaluate their performance while comparing their tasks 'outcomes with their partners'. The teacher provides content feedback and reinforces the language items that emerge from the performed task in which learners are expected to use the form- language while developing their oral production.

8. ACTIVIDADES Y PRÁCTICAS

Students will participate in different kinds of activities such as group-work or collaborative-work activities, basic spontaneous conversations, role-plays, simulations, oral presentations ect. Students will use high -interest themes to integrate language skills, out of class assignments, ect.
