7. ESTRATEGIAS METODOLÓGICAS

ACTIVIDADES TEÓRICAS

This course will use the Task Based Learning (TBL) Approach.

The course follows a task-based approach that consists on fostering different language skills in students while performing a task without pre-determining the language to be studied. Learners learn while completing different tasks. This methodology follows different stages:

Pre-task: In which the students will receive concise instructions and input to determine what to do and to recall some language. This stage will be based on some tasks samples providing the students with a clear model of what is expected to do.

Task: Learners complete the assigned task individually, in pairs or in groups using different features and structures of the language while the teacher organizes and encourages the process.

Students plan and practice what they are going to convey while the teacher monitors and advises to figure out any language questions or doubts. This stage is followed by reporting orally or in a written way to the class taking into account the order the teacher chooses. These practice activities will afford opportunities for the students to talk about their own experiences. Finally, the teacher gives feedback and suggestions to the students and the rest of class.

Post task: Learners evaluate their performance while comparing their tasks 'outcomes with their partners'. The teacher provides content feedback and reinforces the language items that emerge from the performed task in which learners are expected to use the form- language while developing their oral production.

8. ACTIVIDADES Y PRÁCTICAS

The Teacher will plan the learning activities as follows:

Expository class activities. Explanation of topics through the assignment of different tasks that allow the student to develop their communication skills in a real and autonomous way in the classroom.

Practical classroom activities: Different activities based on individual work and interaction in couples and groups. Such as role plays and dynamics where the teacher is a facilitator of knowledge and the student is the center of their learning process.

Some of the above types of activities will be:

- ✓ Written works: preparation and presentation of workshops, short writings related to topics of interest and the content of the level taught.
- ✓ Search and selection of information: complement the topics seen in class through the use of new technologies and use of the moodle platform.
- ✓ -Reads of articles in English: readings related to the topic seen in class
- ✓ -Individual study: Structuring and personal schematization of topics and contents of the subject for understanding, study and, where appropriate, practical application
- ✓ -Follow-up of assigned and / or field work: use of e-mail virtual platforms as a support tool in the Process of the topics seen in class

9. CRITERIOS DE EVALUACIÓN PARA EL DESARROLLO DE COMPETENCIAS

Informal: Se refiere a todas las actividades o pruebas que el docente realiza en el aula con el objetivo de hacerle el seguimiento al desarrollo de competencias; para efectos de la toma de decisiones sobre el seguimiento, el docente de manera autónoma asigna el valor numérico correspondiente. El docente, asimismo, decide qué aspectos del desempeño de los estudiantes son importantes para la evaluación de los objetivos de aprendizaje fijados para la clase (Compromiso, interés, capacidad para negociar y llevar a cabo trabajos en equipo, utilización de la plataforma , etc) Se sugiere una valoración del 40%

Formal

Este tipo de evaluación tiene por objeto que los estudiantes demuestren a través de tareas asignadas por el docente y acompañadas de sus respectivos criterios de evaluación (rubrics), las competencias desarrolladas en una lección, al finalizar una unidad o al culminar el curso. Se realizarán a través de actividades y pruebas; tales como roleplays, simulaciones, escritura de textos, reportes de lecturas, ejercicios de comprensión lectora y auditiva, debates, discusiones, presentaciones, exámenes escritos cortos, exámenes parciales entre otras. En relación con los parciales, se realizarán 3 exámenes escritos y/u orales y éstos deberán ir acompañados de otras pruebas o medios o criterios establecidos por el docente previamente junto con los estudiantes (Cap. IX, Art. 61. Reglamento Estudiantil). Tendrán un valor del 60% de la nota final del curso.
